Configuration Manager

When you select to use the typical installation options, a stand-alone primary site is installed. You can expand this site into a hierarchy at a later time by installing a central administration site. Do you want to continue?

Yes No

## Primary Site Installation

Specify whether to join the primary site to an existing Configuration Manager hierarchy or install the primary site as a stand-alone site.

Join the primary site to an existing hierarchy

Central administration site server (FQDN): Example: server1.contoso.com

Install the primary site as a stand-alone site
